shur-loc® Premium Fabric Panels

- Precision cut mesh panel designed to fit your frame.
- Largest selection of mesh counts ranging from 25 - 460.
- The easiest, most accurate way to stretch mesh on frames.
- Removable and reusable.
- Additional thread diameters for greater selection.

Direct To Screen Compatible

- Optimally tensioned mesh coats evenly.
- Removal of excess corner mesh saves tape and labor.
- Tighter corner designs will not trigger sensors on DTS equipment.
- Built-in frame deflection compensation.

shur-loc® Premium Panels feature mesh from only the highest quality manufacturers.

shur-loc® Econ Fabric Panels

- Panels for common size frames.
- Color Coded for easy identification.
- Tracking stamps included.
- High quality, low elongation mesh.
- Most common mesh counts available.
- Incredible savings for standard mesh counts.

 **shur-loc® Endurance Panel**
MADE IN THE USA • (800) 247-582 • ENDURANCE@SHURLOCCOM

shur-loc® Endurance Panels

- Chemically resistant for increased longevity.
- Embedded tracking and color code stamps.
- Eliminates the need for expensive tapes.
- Extreme 360° edge protection.
- Built-in corner softening.
- More stable print area.
- Rolls for easy shipping.

shur-loc® Endurance Rods

- Reusable and chemical resistant.
- Rods for use with "E-Z" Frames.
- Apply multiple rods to add tension.
- Flat locking strips for roller frames.

Our patented Endurance technology provides a 360° perimeter of protection around the panel, making it our most durable fabric ever.

TEF-LOC PTFE Coated Fabric Panel

- Compresses garment fibers for smoother prints.
- Ink smoothing for layered prints.
- Order "E-Z" Frames prestretched.
- Common roller frame sizes available.
- Patented non-slip Endurance System connector.
- Compatible with most roller and heating systems.

Scan the code and see it in action!

"E-Z" Frame System

shur-loc® "E-Z" Frame System

- Stretches to optimal tensions in seconds.
- Rectangular tube construction allows for easy clamping.
- Up to 40% larger print area than popular roller frames.
- Simple designs can be removed and reused.
- Multiple styles to fit every need.
- No bolts to loosen and tighten.
- No grinding or glue to remove.
- Stock only the mesh you need.

"E-Z" Tension Bar

"E-Z" 2nd Tension Bar

"E-Z" Endurance Tension Bar

shur-loc® "E-Z" 125 Series Frame

- Ideal profile for textile printers.
- Available in sizes up to 23" x 33".
- Lighter weight profile to prevent operator fatigue.
- Leakproof design.
- Welded corner assembly available.

shur-loc® "E-Z" 1.5 Series Frame

- Heavy duty tube profile minimizes deflection.
- 1.5" tube assembly for greater stability.
- Available in tube lengths up to 38".

shur-loc® "E-Z" 2.0 Series Frame

- Industrial strength 2" profile design.
- Large format and circuit board industry solution.
- Available in tube sizes up to 55".
- Set screws hold 22.5° biased fabric panels.
- Compatible with DP1500, DP2500 & DP3500 coating machines.

"It gives us ideal mesh tension without the labor hassles of roller frames. Panel mounting is quick and easy vs. roller frames and the square profile is a plus to almost any machine. Frames are also built for the long haul, reusable almost indefinitely, a worthy investment in both quality and efficiency."

- Anonymous Shop Owner

“When we receive a larger order with a quick turn around time and don't have the frames with mesh ready to go, we can easily stretch 35 frames and have them ready, prepped and coated within 4 hours and be ready for production.”

Kevin Richendollar - JakPrints

shur-loc® “E-Z” Stretcher

- Produces perfect screens in as little as one minute.
- Works with every style of the shur-loc® “E-Z” Frame System.
- Alignment blocks can be used for 22.5° fabric panels.
- Available in 3 sizes: Standard, Large and XL.
- Available for oversized frames.

shur-loc® “E-Z” Tensioning Tool

- Can be used with 125 and 1.5 Series frames.
- Most economical “E-Z” Tensioning System.
- Safety bar mounts to virtually any table.
- Stretches screen up to 31” in size.
- Works on multiple frame sizes.
- Stores easily when not in use.
- Mesh installation angle included.
- Additional tensioning strip included.

“E-Z” Tensioning Systems

Squeegee Clean

Scan Me

shur-loc® Squeegee Clean

- Quickly clean squeegees, flood bars and spatulas.
- Durable metal construction resists non-caustic chemicals.
- Quad-brush formation cleans the dirtiest parts in seconds.
- Reuse chemicals after cleaning the box for increased efficiency.
- Open ended design allows for the cleaning of any length squeegee.
- The Squeegee Clean is available in the standard aluminum design or upgrade to stainless steel.

The Squeegee Clean is also a great way to clean "E-Z" Frame System Tension Bars, Endurance Bars and 2nd Tension Bars.

Squeegee Clean Storage Lid

- Cuts chemical consumption by preventing evaporation.
- Blocks contaminants from entering the box.

Squeegee Clean Auto-Lid

- Holds squeegees securely.
- Rapid change over.
- Eliminates possible overspray.
- Protects operators from harmful chemicals.

Lids are available for many popular automatic squeegee styles including: M&R, Roq and MHM.

"We clean, on average, 350 squeegees, 350 flood bars and 350 spatulas daily and the Squeegee Clean has reduced the time spent cleaning by 50%! On top of that, we have reduced our chemical usage by 45%!"

Ron Pierson - Pierson Productions

A tension meter is an essential tool for every screen print shop. By checking screens regularly to ensure proper tension, you'll achieve higher quality prints.

shur-loc® Shur-Chek 130 Tension Meter

The bi-directional shur-loc® shur-chek 130 Tension Meter is the perfect compliment to anyone using the shur-loc® fabric panel or traditional fabric stretching.

- Jeweled movement insures accuracy to +/- 1% for the full scale of the dial.
- Heavy duty construction for the most extreme production floor environments.
- Engineered design allows for greater resistance to impacts and jarring.
- Impact resistant, dedicated plastic hard case with patented unbreakable latch included.
- Precision die cut custom foam interior securely holds and protects your tension meter.
- Accurately measures tension in both warp and weft directions of the mesh.
- 5/16" thick glass calibration standard included.
- Indicator made to AGD design specifications.

shur-loc® Accelerator X Tensioning System

- Stretches virtually any roller frame size 23x31 and under.
- Patented physical stop system eliminates over-tensioning.
- Support pads prevent frame fatigue and breakage.
- Numbering system allows for quick tensioning.
- Works with square bar or all round tube frames.
- 1/2 movements for precise rotation.

shur-loc® Accelerator Turntable and Base

- Available for Accelerator X and 2 Tensioning Systems.
- Allows user to turn the table to rotate work to them.
- Change frame size or styles in seconds.
- Saves space and increases efficiency.
- Pre-drilled with common frame sizes.
- Permanent steel threaded inserts.

shur-loc® Accelerator 2 Tensioning System

- Includes every benefit of the Accelerator X system.
- Stretches larger format M3 and MZX style frames.
- One kit stretches every frame.
- Individual physical stop pins for greater control.

Accelerator X (shown) features the patented shur-loc® numbering system for easy tensioning.

shur-loc® Split Tape

- Specifically designed for screen printers.
- White areas have strong adhesive to seal out ink.
- Black areas have less adhesive to release easily from the frame.
- Split adhesive design saves time during removal.
- Dispensers available.
- 3" width x 60 yard rolls.

Riley Hopkins Stack Rack

- Holds 20 - 23x31 or 20x24 frames.
- Durable aluminum construction.
- Heavy duty casters included.
- Unstack for even more storage options.

Caseys' Translucency

- Output film positives from laser printers.
- Less expensive than camera and film output.
- Won't jam in printers like drafting vellum.
- More durable and stable than other vellums.
- Available in Letter, Legal, Tabloid and Oversized sheets.

Polyken Frame Tape

- Provides a layer of protection for vulnerable mesh.
- Tape absorbs impacts to prolong mesh life.
- Robust adhesive holds even during cleaning.
- 2" width x 60 yard rolls.

X-Treme Standing Mats

- The ultimate shock absorber for extreme standing or kneeling.
- Keeps body in gentle motion to improve circulation and joint lubrication.
- Reduces operator's long term standing fatigue.
- Closed cell foam prevents liquid absorption.
- Eliminates high frequency vibrations.
- Designed for fixed workstations.
- Yellow safety caution bars alert users to 1" height.
- Available in 14"x21", 24"x36", 36"x60" and 36"x84" sizes.
